## Natural Foods for Upland Game Birds, Waterfowl, Song Birds and Other Wildlife

The secret in attracting Quail, Pheasants, Grouse, Song Birds or any other Wildlife, lies in furnishing them with plenty of food, cover, shelter, escape and concealment areas, and nesting sites. Food patches should always be near adequate cover. Travel lanes, in the case of Quail, Pheasants or other upland game, furnishing cover, concealment and protection for game birds, should be established — fence-rows planted with climbing vines, shrubs, trees, provide this sort of cover in a most excellent way, and they also furnish an abundance of food in the berries, and seeds they produce.

## Keep the Dame at Home

If wildlife on your property does not find enough food, it leaves for other areas in search of food, or becomes weak, and undernourished, and easy prey for predators. Provide important food and cover for your game birds by planting the following food-producing plants.

TREES, SHRUBS, VINES AND PLANTS THAT FURNISH FOOD AND SHELTER FOR SONG BIRDS, QUAIL, PHEASANTS, PRAIRIE CHICKEN, WILD TURKEY, GROUSE AND OTHER GAME AND WILDLIFE.

These plants are ornamental and add much to the natural beauty of areas where planted.

KEY:-

W — Will grow in moist to wet situations, as well as in garden soil and lawns.

T — Thicket-forming for cover and concealment.

X — Transplant. S — Seedlings.

### Food Patches for Upland Game Birds

The term "food patches" refers to plots of grains, seeds, foliage, and tuber-producing crop plants, most of which are planted each year. The soils should be prepared for these food patches, as you would prepare it for sowing other grains. Plant in plots of about 1/4 to 1/2 acre, preferably in long, narrow strips, located in, or adjacent to natural cover — such as brushy fence rows, ditch banks, gulleys, or borders, where fruit, berry and seed-bearing trees, shrubs, vines and plants grow naturally, or are planted for the purpose of furnishing natural food and cover for wildlife.

Sow 25 lbs. of seed mixture per acre in spring — preferably broadcasted by hand, since the drill will not equally distribute the mixture, due to the difference in sizes of the various seeds in the mixtures. The mixtures include plants that hold their seeds well through winter, providing food when the wildlife needs it most.

This special mixture is made up of two different formulas, one for the Northern states and one for the Southern states. We'll send the proper mixture of seeds for your locality.

#### **UPLAND GAME FOOD MIXTURE**

SEED at \$38 per 100 lbs.; 25 lbs., \$12.50.

These are dry seeds that can be shipped by freight if desired.

**DUCK WHEAT - GOOSE BUCKWHEAT** 

This is an excellent food for Pheasants, Quail and other upland game birds. Wild ducks eat it when growing near water. It holds its seed well into cold weather and the birds are extremely fond of it. You can grow a crop on almost any type of soil, mud, peat or even light sandy soil that will hardy grow anything else. We have had excellent growths from our seed even when planted in the "blow sand" of central Illinois. Holding its seed well into winter makes it one of the best upland game bird grains. Sow 50 lbs. per acre in the Spring as per detailed instructions sent with shipment.

SEED: \$10 per 100 lbs.; \$6 for 50 lbs,; 35c per lb. in small lots. These are dry seeds that can be shipped by freight if desired.

CHUFA

Chufa is one of the best Wild Turkey coaxers. This plant produces hundreds of tiny tubers that attract and hold Wild Turkeys, Quail, Doves and Wild Ducks. It is very easily grown and while a Southern plant, it does produce an abundance of food for the birds as far North as the center of Illinois. This plant is recommended very highly by all game bird food specialists for attracting Wild Turkeys and other game birds. If you have any ponds that can be controlled as to water supply and level, this is an excellent natural food to use. Drain the area, then sow 40 lbs. per acre, and after the plants mature and just prior to the opening of the season, flood the area and then you'll be surprised to see how the ducks "work" in the ponds.

SEED: 100 lbs., \$65; 40 lbs., \$28; smaller lots, 75c lb. These are dry seeds that can be shipped by freight if desired.

#### SESBANIA

Plant the seed of this plant as early as possible in the Spring to make certain of a mature crop of food for the birds. Just sow the seed on mud flats, in shallow water or in any low, marshy area for best results. Sow 20 lbs. per acre. The seed produced by this plant is eaten by Quail, Wild Turkeys and other upland game birds and Wild Ducks.

SEED: 100 lbs. or more 45c per lb. Smaller lots, 75c per lb.; 20 lbs. for \$12.

These are dry seeds that can be shipped by freight if desired.

## WILD MILLET (Echinochloa crus-Galli)

If you have any mud flats that are flooded during the duck season and just moist the balance of the year the Wild Duck Millet is the food for you plant there. It will grow in ordinary garden soil and that is why it can be used in planting ponds that may be flooded during the duck flight. This is excellent cover and blind plant also, so by one planting you may accomplish a two-fold purpose, both feed and cover. Excellent for Quail, Doves and other upland game birds as well as Wild Ducks and Geese.

We recommend a progressive planting from early in the season until about August 10th in the North and to September 1st in the South. To insure an abundance of food available from the very beginning of the season and throughout. California and areas that have considerable fog sow from March to June. In foggy locations it takes longer to mature. The result will be a stand of the finest food for the game birds as well as wild ducks and geese that will not only attract the birds in flocks but will hold them and give you some of the finest sport you have ever had. Quick growing. 100 lbs. sows 4 acres.

GRADE A-1 SEED: 100 lbs., \$15; 25 lbs., \$5; smaller lots, 25c lb.

These are dry seeds that can be shipped by freight if desired.

### WILD FLOWERS

KEA:—

A — Prefer Slightly Acid Soil B — Acid-loving Plants (See Note On "Acid Soil" At End Of List.)

O — For Open Sunny Places

M — For Bogs or Wet Locations.

\* — Suitable for Rock Gardens.

Other Plants Grow In Neutral To Sweet Lime-Reaction Soils.
Where No Preference Indicated, Plants Grow In Acid or
Sweet Soils, Any Location.

*Virginiensis, Virginia Saxifrage 3.00	15.00
*Sisyrinchium angustifolium, Blue-eyed Grass 3.00	15.00
Smilacina racemosa, Feather Solomonplume,	
S, M 3.00	15.00
Solidago sempervirens, Seaside Goldenrod, O 3.75	19.00
*Thalictrum dioicum, Early Meadowrue, S or Semi-S3.00	15.00
Polygamum, Tall Meadowrue 3.00	15.00
*Tiarella cordifolia, Allegany Foam Flower, S 3.00	16.00
Tradescantia virginiana, Virginia Spider-	
wort, O 3.00	16.00
Trientalis borealis, American Starflower, A . 3.00	16.00
*Uvularia grandiflora, Big Merrybells 3.75 Verbena hastata, Blue Verbena 3.75	22.00 18.00
*Veronica officinalis, Drug Speedwell, O 3.00	15.00
*Vinca minor, Common Periwinkle 3.00	14.00
Viola blanda, Sweet White Violet 3.00	14.00
*Canadensis, Canada violet 3.50	18.00
*Pedata (bicolor), Two color Birdsfoot Violet,	
strong plants, A 3.00	16.00
Blue Beauty Violet, long-stem, bloom size . 3.00	14.00
ACID SOIL — We offer native shredded and screened	
Very acid and ideal for mixing with soil for hardy feri wild flowers. 100 lbs., \$3.50; 500 lbs., \$15.00.	ns and
Rotted Pine Needles for mulching and adding to s	oil for
acid loving plants. 3 bushel sack, \$4; 5 sacks, \$17.00.	011 101
HARDY FERNS
